## **Traffic will be moved to a temporary gravel roadway on ND Hwy 22 north of Killdeer on Friday, July 27<sup>th</sup>**

**DICKINSON, N.D. (July 26, 2012)** – Beginning Friday, July 27<sup>th</sup>, traffic will be detoured on ND Hwy 22, approximately 17 miles north of Killdeer, to a temporary gravel roadway. The surface will be gravel and a 25 mph speed limit will be in place. This temporary roadway is three miles long. There is a 12 foot width restriction in place through the detour and at the Lost Bridge. Motorists, especially motorcycles, should exercise extreme caution when traveling on the gravel surface, especially during wet conditions which may cause the gravel to become slippery.

### **Project Overview:**

This project includes the reconstruction and widening of North Dakota Hwy 22, beginning 13 miles north of Killdeer and continuing north 7.5 miles to the Lost Bridge. The project includes widening the roadway to provide an 8 foot paved shoulder, realigning some of the curves, a passing/climbing lane south of the Lost Bridge, a right turn lane at the Little Missouri State Park approach, and truck chain-up and Highway Patrol inspection areas. During the project, two-way traffic will be maintained on a combination of scoria, gravel and pavement. There will be a gravel surfaced bypass for the roadway reconstruction areas. For more information on Dickinson District projects, including the roundabout on Highway 22, please visit our website <http://www.nddotdickinson.com>.
